

Jassid

by Jerry Hopewell

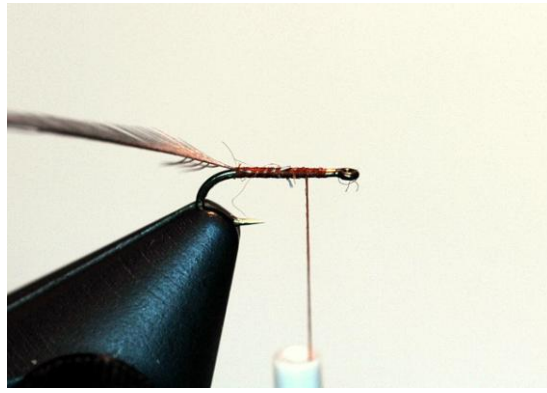

Here is a fly for those inclined to fish or tie small patterns. I first read of this fly in a book by Vince Marinaro A Modern Dry Fly Code. It is meant to represent a small leaf hopper called a Jassid.

Hook: size 22 or short 20 dry fly hook
Thread: I used 10/0 color is your choice
Hackle: Dun for the hook size
Top: Jungle Cock small to medium size

Place the hook in the vise, make a thread base and tie in the hackle.

Wrap the hackle forward, secure the hackle, cut the excess and trim the top of the hackle.

Place the Jungle Cock on top of the hook shank, secure and trim the excess.
